**Award for the
best pitches**
with prize money

DIGITAL BOOTCAMP

The German-Netherlands Interreg CE3 project challenges you to educate yourself about **international technology and business opportunities** and teach you **how to make a lasting impact**.

International students from Hochschule Duesseldorf, Hogeschool Zuyd, Fontys, Hochschule Esslingen and Technical University of Eindhoven will **work together in multidisciplinary ways** and **collaborate with external stakeholders from Germany and the Netherlands**.

We offer two different tracks – for **individual students** interested in entrepreneurship and **existing teams** with a business idea.

Individual students

Join an existing team during the workshop or work on stakeholder challenges, come up with creative solutions to make progress or solve these challenges completely. We will guide you through the whole process from building teams to individual coaching sessions.

Existing teams

Work on your business idea, find new team members or get support during the bootcamp. You have the chance to indicate specific coaching demands upon registering and will receive targeted coaching.

The **best pitches will be awarded** with prize money and continuing unique **individual coaching opportunities**.
