

Practical Semester/ Internship

R&D - Product Development Water & Fountain Dispenser (m/f/d)

Become part of a global leader and help set people's food and beverage behaviors on a sustainable and innovative path.

Marmon Foodservice Technologies is part of the Marmon Holdings, Inc (A Berkshire Hathaway Company) and one of the worldwide leaders when it comes to food & beverage technologies. MFT consists of 10 companies with more than 2000 employees who strive every day to develop new, sustainable and innovative ideas to offer to our customers. Our aim is to inspire our customers with innovative food & drinking experiences which are future proof to keep being one of the leading providers in this market segment.

How you can get involved with us and develop yourself and us further.

Recognizing trends, thinking in a visionary-creative way, seeing change as an opportunity - with these core competencies we lay the foundation for new products in our various areas. We see our responsibility for innovation as a daily challenge. Our recipe for success in R&D is the close exchange with product marketing and suppliers as well as the courage to break new ground. In the R&D team, we develop and support beverage dispensers that are used at home, in offices or in industry. You will become an active part of the development team.

Specifically, this means:

- You support the development department in day-to-day and project business
- You are actively involved in prototype and equipment sample construction
- Functional models are put into operation by you
- In addition, you will perform device and software tests
- In addition, you will support your team in all other day-to-day business activities

Best conditions for your entry

- You are a student of a technical or scientific course of study
- Ideally, you also have a technical education or initial programming experience
- You are confident in dealing with MS Office applications (esp. Excel)
- You have very good English skills; Ideally you speak German
- An independent, structured and careful way of working as well as manual dexterity characterize you
- If you also have a hands-on mentality and team spirit, you've come to the right place.

Working hours and duration

- Full time, 40 hours per week
- Practical semester, availability for 4-6 months, with option for a additional contract for working students afterwards.

What we offer you

Appreciation and recognition for the dedicated commitment of our employees are important factors for successful cooperation. We want you to develop during your time at MFT, be given space to learn, take on your responsibilities as an active team member and have fun at work. In order to achieve this, we offer you, among other things:

- An open and dynamic corporate culture paired with the opportunity to work independently
- A challenging and international working environment with exciting tasks in an industry of the future
- Flexible working hours for the ideal compatibility of studies and job
- An attractive and fair salary and 30 days of holidays (per full year)
- Subsidized canteen; free hot / cold drinks and a weekly fruit offer
