Sprache

Englisch

Contents

- Behavioral Economics uses insights from psychology to inform economic thinking and theorizing, especially about human biases in decision making.
- Behavioral Economics sometimes makes use of Economic Games. Economic Games are highly structured interactive games to test hypotheses about economic strategic behavior, e.g. about cooperation, fairness etc.
- Topics of the course are
 - Prospect Theory & Hyperbolic Discounting
 - Social Utility & Cooperation
 - Incomplete Information & Bounded Rationality or Irrationality
 - Morals & Trolleyology
 - Economic Games (e.g. Prisoners' Dilemma, Dictator Game or Public Goods Game)
